

Local man stabbed during attempted robbery.

While no one else was hurt, the robber was stabbed 28 times while searching the house. While no items were taken off the property the homeowner will not disclose the object that warranted stabbing someone 28 times for it.

We went ahead and visited the robber while in the hospital to see what why he attempted to rob the house, this is what the man had to say. "The guy had a *Nvidia RTX 3060* so I knew he would have some good stuff to steal if he could afford that."
